Photarity

UX CASE STUDY

BRIEF

Project for User Experience course developing a website from start to finish built on user experience principles.

The idea behind Photarity was a photography company that donated a portion of profits to eco-based charities of the client's choice.

PERSONA

Sami Jones | Creative Visionary

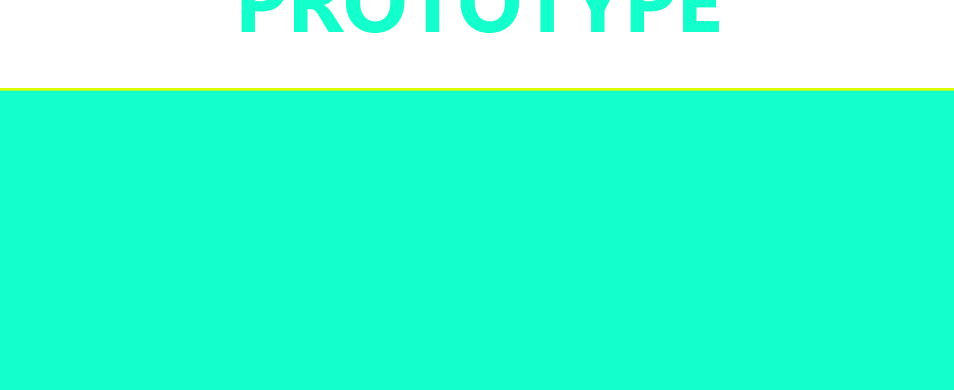

A 28 year old marketing manager at a local product design firm. Seeking a photography company like Photarity to assist with sustainable marketing campaigns & promotional materials that also support a charitable cause.

"MAKING A DIFFERENCE IN THE WORLD STARTS WITH ME."

STYLE

Navigation icons: Home, Search, Menu, Cloud, Filter, Share

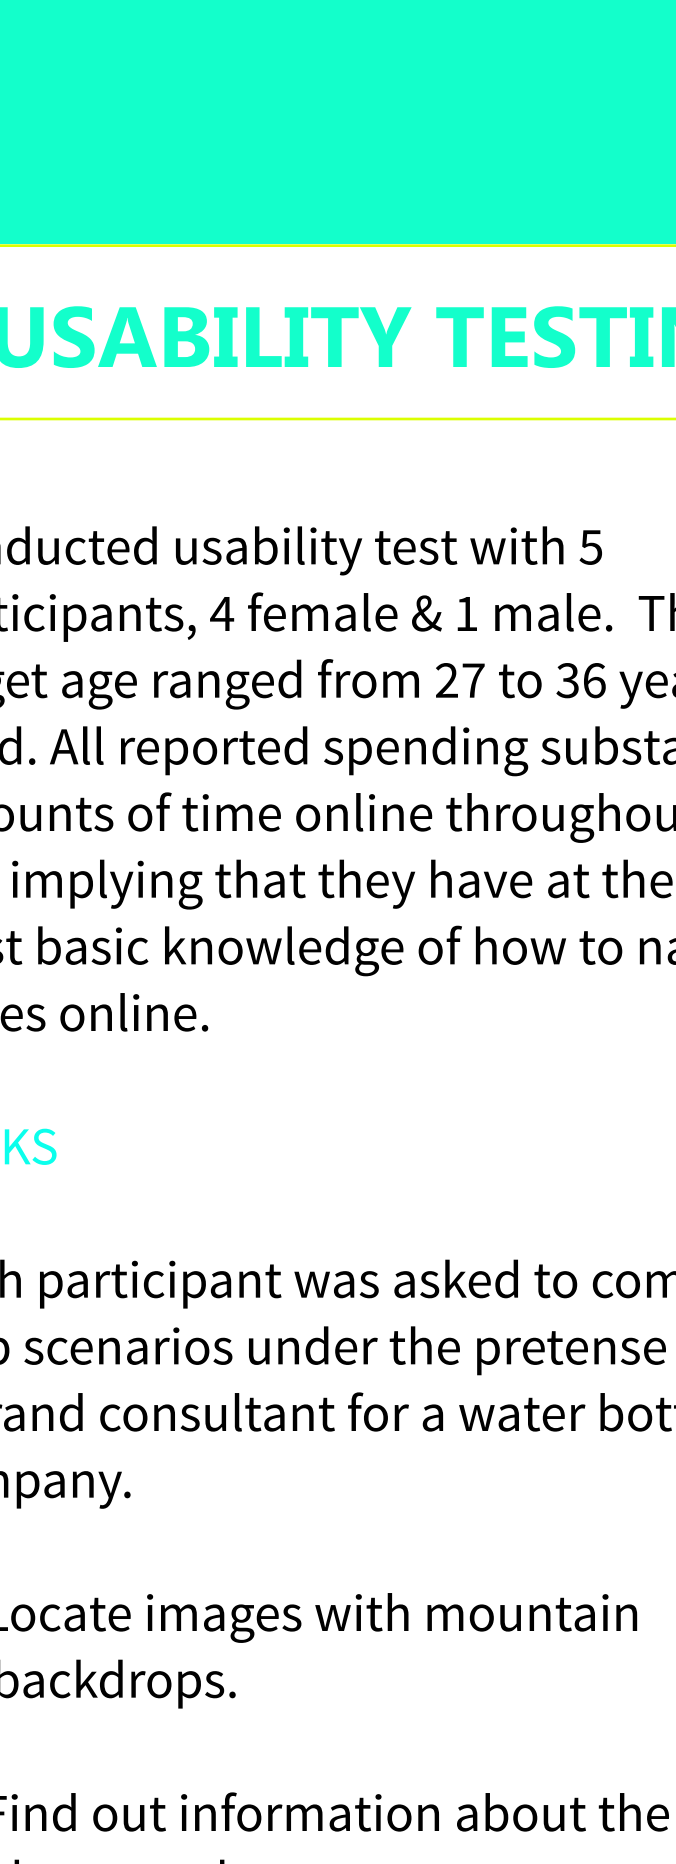

H1 Prada 48px

H2 Prada 36px

H3 Prada 28px

Body Gruppo 20px

PROTOTYPE

USABILITY TESTING

Conducted usability test with 5 participants, 4 female & 1 male. The target age ranged from 27 to 36 years of aged. All reported spending substantial amounts of time online throughout the day implying that they have at the very least basic knowledge of how to navigate pages online.

TASKS

Each participant was asked to complete 3 step scenarios under the pretense of being a brand consultant for a water bottle company.

1. Locate images with mountain backdrops.
2. Find out information about the photographer.
3. Locate where to contact the photographer.

FINDINGS

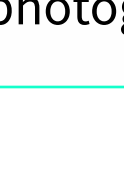

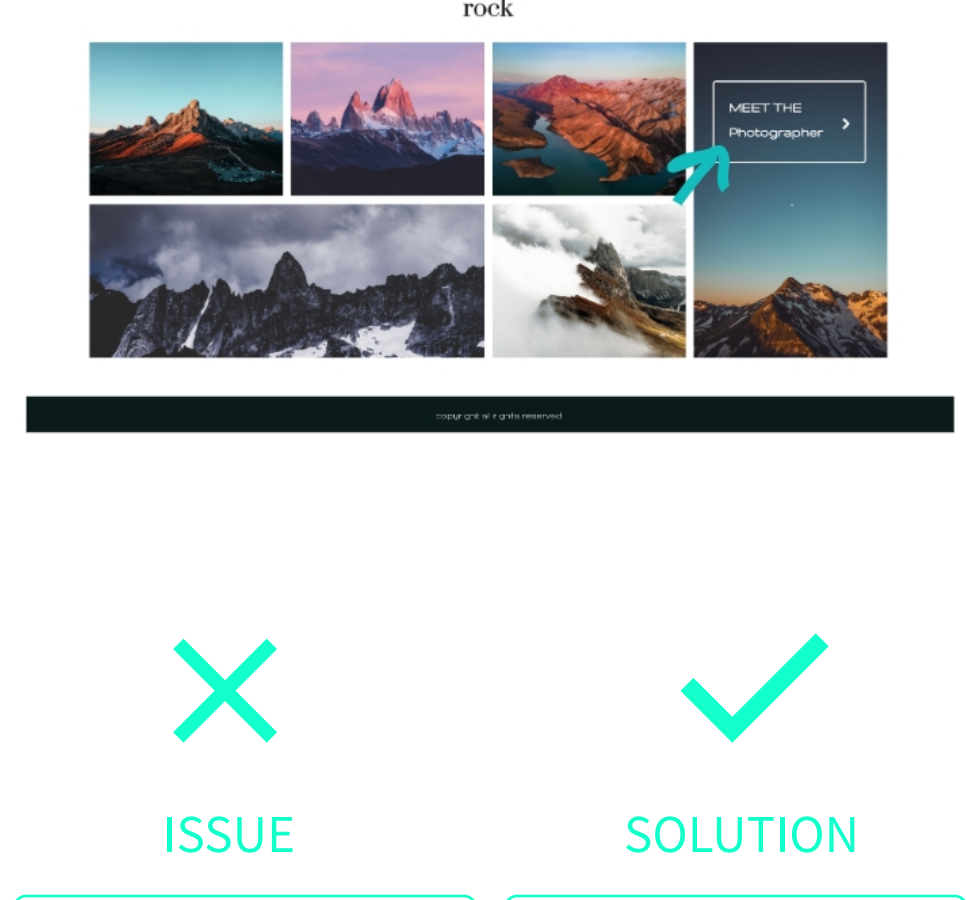

ISSUE

Users clicked on the landing page image expecting to be directed to the Gallery page.

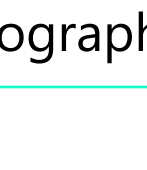

SOLUTION

Link the landing page image & add button to enter Gallery.

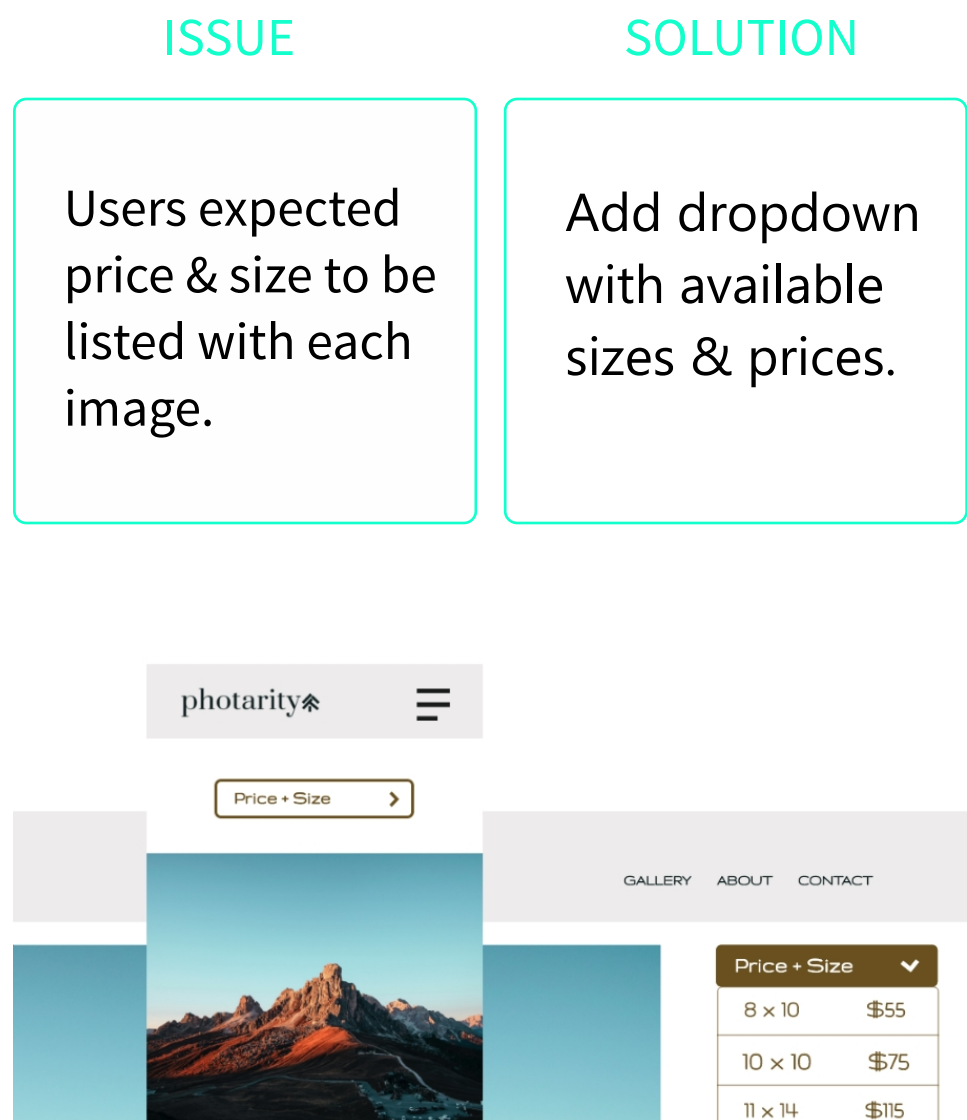

ISSUE

Users clicked on individual image in gallery expecting to see info about the photographer.

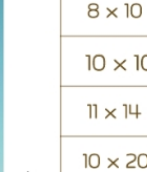

SOLUTION

Add content on gallery page to direct users to meet the photographer.

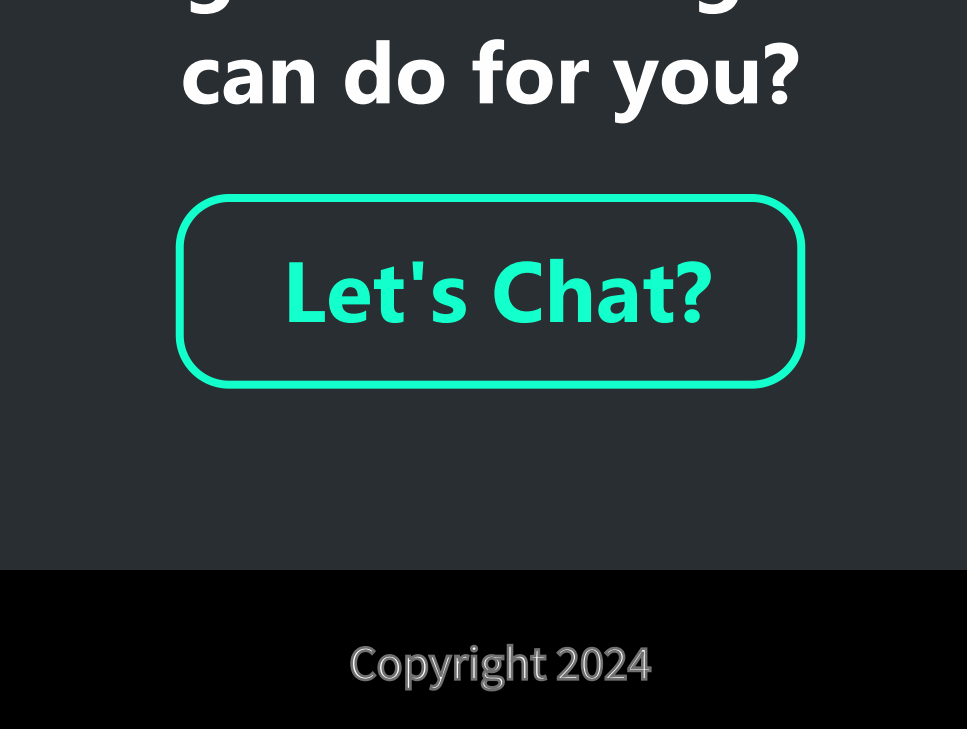

ISSUE

Users expected price & size to be listed with each image.

SOLUTION

Add dropdown with available sizes & prices.

Fitmosphere

HTML | CSS | FIGMA | BOOTSTRAP

BRIEF

Final project for an Advanced CSS course building a personal website that is centered around fitness and health to motivate positive lifestyles.

Utilizing different pages to cover topics on key exercise, healthy eating, inspirational quotes, etc. I explore holistic approaches that can be easily translated across a web platform.

Car Deal

HTML | CSS | Bootstrap

BRIEF

Project for portfolio class to work with Bootstrap in styling a one page site. Car Deal buys and sells cars.

In this project, I utilized Bootstraps card, form, accordion, and carousel components to design the different sections to give off a trustworthy & professional business vibe.

The Advantages of Selling Your Car to Cardeal

If you're like most people, you don't look forward to dealing with a pushy car salesperson. Cardeal offers a better way for you to sell or trade in your. See the following reasons people choose Cardeal.

Our offers are very competitive; you'll get more money for your car than a standard dealer trade-in.

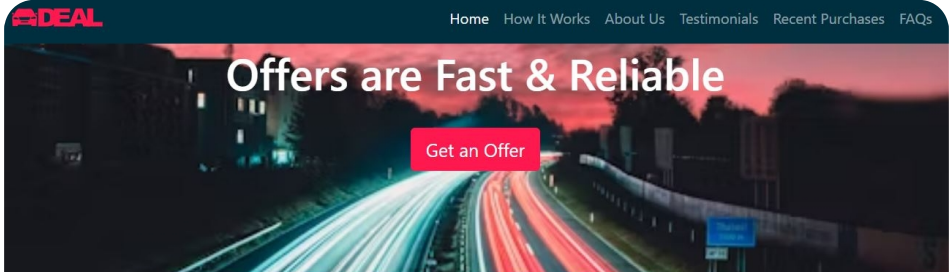

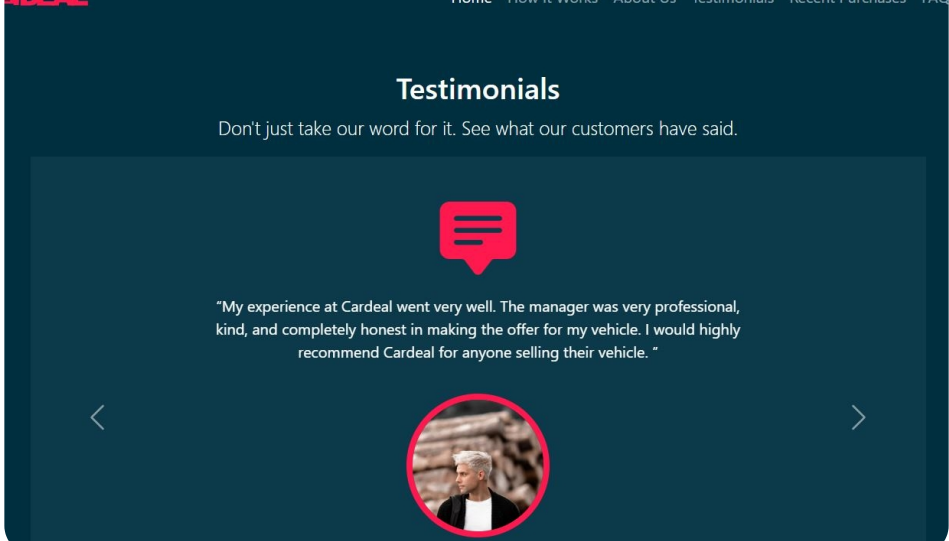

We are happy to take off your hands "less-than-perfect" cars that have body damage, mechanical problems, or excess wear and tear.

We'll buy your car and you aren't required to buy one from us.

Avoid getting ripped off by scammers and swindlers. We make the process of selling your car fast, easy and safe.

Recent Purchases

Here are some recently purchased cars that you might be interested in with a trade-in.

Storm

HTML | CSS | Bootstrap

BRIEF

Project for portfolio course to redesign a website. Deciding to go with a previous 99Designs contest brief posted by Snow Snowboards, I redesigned their current website.

Using Storm's logo, font, board images, & similar content, the redesigned site is more apt to invite riders & investors alike.

Do you ever see a skateboarder strap in before taking off down a ramp? Or a surfer attach their feet to their board before hitting that next wave? Here at Storm, we firmly believe that freedom isn't strapped in, it's being allowed to ride how you want when you want. This left us thinking, is there a better way to experience the slopes without the constant struggle of bindings? The answer is going to take **SNOWBOARDING BY STORM.**

NEXT GENERATION SNOWBOARD

Owning three design patents, start-up company Storm Snowboards has revolutionized the Next Generation of snowboards. Storm's design allows riders the freedom to ride however they want. You got it, ANYWAY YOU WANT! No more strapping in, simply ride the slopes as intended.

Never been on a snowboard, no problem! Storm Snowboards have been universally designed in a way that opens the door for all to learn to ride. Taking the pain out from learning to snowboard, and putting the joy back in. It doesn't get any simpler. The evolution of snowboards has arrived, take the mountain back with Storm.

INVEST IN SNOWBOARDING'S FUTURE

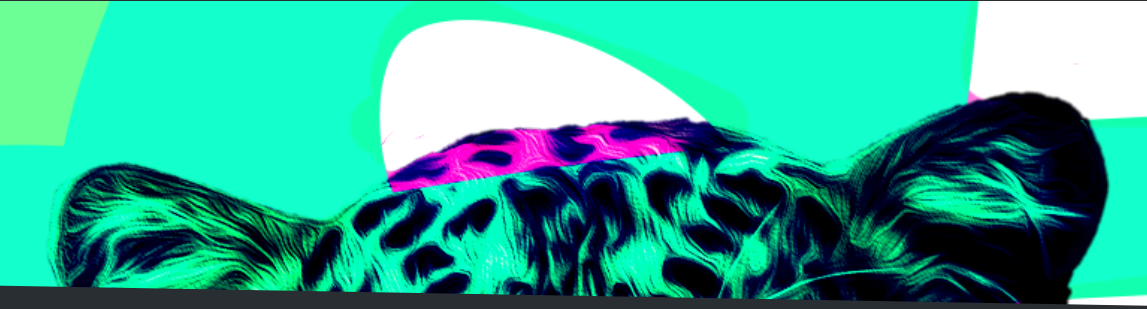

Don't miss an opportunity to shape Snowboarding's Ride!

With so many people who have yet embraced the amazing adventures that await them on a snowboard, Storm removes the barrier to fun. As an investor, you can jump on board from the base of the slopes and ride the market all the way to the top. The view is great and prospective. Don't hesitate, feel free to contact Randel, he's expecting your call!
